

Standard Z-Cap

DESCRIPTION

Fast, smooth, detailed and less grainy compared to similar competitor Caps on the world market.

The materials we use are chosen for the best sonically results in its price class.

Standard caps are made to provide lowest possibly microphonic effect.

The capacitors are available in a wide range of capacitance values with low tolerance.

SPECIFICATIONS

Film: Metallized polypropylene

Voltage rating: 400 VDC 200 VAC

Tolerance: max. 5%, typically 3%

Loss ang. tan: = 0.0002 for 1kHz / 1 uF

The finish is a flame-retardant tape wrap.
